

'Fibreglass 4 Leisure' Left Hand Curved Pool Slide with Steps Assembly Instructions

Please Note: Assembly is a two person job

1. Bolt steps to slide first with the 4 shorter bolts provided.

2. This end of the handrail goes in first on each side. Hand rails are marked left and right.

3. This end of the handrail goes in second. If a little tight – tap with a block of wood.

2 x 12mm x 70mm Dynabolts to Pool Coping in holes provided

2 x 12mm x 70mm Dynabolts to Concrete Slab

Position slide that best suits your situation then mark hole positions for the dynabolts . Move slide to one side then drill the holes for the dynabolts to the correct depth.

Care Instructions:

To maintain a good shiny high gloss look for your slide, we recommend you use a Boat Polish.

If your slide gets scratched use wet & dry sandpaper. 400 grit for deep scratches followed by 1200 grit, to remove any small scratches the 400 grit sandpaper may have made. Dry off and polish as above.
