

Gelcoat - Flowcoat - Pigment Paste

# COLOUR SOLUTIONS

Enriching lives through Innovations

## Standard Colour Range

Colour matching also available

Percentage figures indicate the recommended addition rate into natural gelcoat to provide suitable opacity at 0.38 mm (0.015") cured film thickness.

The colours on this chart are close to the actual gelcoat colours but should not be assumed to be exact colours.

+ Product Codes beginning with HP contain lead pigments.

\* Please note: applications that involve prolonged contact with water (such as swimming pools, spas and boats) require specially formulated gelcoats. Contact your local Nupol Composites division branch for a specific recommendation.
